Abstract (en)
[origin: US6183311B1] A protective conductor clamp having a mounting leg for mounting the clamp on a support rail and a contact rail that is connected electrically conducting to the mounting base and is provided with at least one conductor connection. The mounting base has shaped sections for holding a spring element for bracing the mounting base in the support rail. The shaped sections are formed by recesses in two parallel-arranged side walls of the mounting base, between which the spring element is inserted.
