Abstract (en)
[origin: WO9735289A1] Holder for marking labels, particularly for marking of electrical components. The holder comprises a coupling element (11) provided with at least two, and preferably three mounting surfaces (14, 16, 18) situated in different planes, a first one (14) of which is designed with an attachment part (15) for connection of a label ledger (13) to which said marking labels (31) are attachable, and at least a second mounting surface (16) for affixing the coupling element (11) via attachment means (12) to a base (33). The coupling element (11) is constituted by a L- or U-shaped profile, the shanks of which are designed to form said mounting surfaces (14, 16, 18). The end of one free shank (14) of the profile is designed with an attachment part (15) for attachment of the label ledger (13). At least one shank or the other shanks (16, 18) is/are provided with means for arresting the coupling element (11) to the base (33), which means are constituted by at least one, preferably non-round hole (17, 19) and a locking tab (20) designed for cooperation with the hole and having a corresponding cross section.
