Abstract (en)

[origin: EP0891724A2] The strip has, between the connecting lug (12) and the holding part (16) an adhesive part (10) has at least one spacer (14). The spacer is a part of the distance holder or the holding part. The connecting lug has a hook, T, mushroom, horn or arrow shape. The distance holder (18) forms a distance plate, which is bigger than the basic surface of the connecting part projectable on it. On the band-shaped holding part and at a right angle to it the connecting lugs are located, the distance of which from the holding part is equally dimensioned.
