Abstract (en)  
The seating device comprises a stainless steel frame (1) with two L-shaped parallel positioned elements (2,3) forming back and seat area which are joined with a traverse (5) at their upper end and which have handles (9a, 9b) pointing to the back. The lower part of the frame (1) is bent to form an U-shaped base (4a, 4b) which is pushed between mattress and bed frame. The seat is held safely in position by the weight of the patient.
