Abstract (en)
Arrangement in a poster cabinet of the kind that contains two paper posters facing in opposite directions and illuminated from behind (36,37), where there is outside each poster a flat, transparent cabinet side (2,7) and inside each poster a translucent layer (17,18), between which the lighting (13) is situated, characterised in that one cabinet side (1) may be fixed whilst the other (7) is pivotingly articulated in the upper part (8) of the cabinet so that its lowest part can be swung outwards/upwards from the lower part of the cabinet, that the translucent layers (17,18) are fixed to a frame (9) which is pivoted so that its lowest part can be swung outward/upward from the lower part of the cabinet when the side of the cabinet is open, that the frame is connected to the cabinet side so that when the cabinet side is raised, the frame pivots upwards so that such a large space is formed between the lower part (4) of the cabinet side and the translucent layer (17) closest to it, that the posters can be attached and loaded into this space, and that there is a loading space for the posters, pivoted in the lower part of the frame. <IMAGE>
