Abstract (en)

[origin: WO9731090A1] The present invention relates to a cleaning composition comprising peroxidase, an enhancer and a source of hydrogen peroxide. Said peroxidase is incorporated into a release agent, whereby said release agent is such that the level of active peroxidase is substantially held constant in the wash environment during a substantial period of the wash cycle. The cleaning composition according to the present invention achieves an improved dye transfer inhibition and/or bleaching benefits.
