Abstract (en)

[origin: WO9833988A1] Sealing section (1) for tunnel segments, comprising a body (2) provided with fastening means for fastening the section to a longitudinal edge (8) of a first tunnel segment (9), and a nose part (5) extending from the body, which nose part can be brought into contact with an opposite longitudinal edge (8') of a second tunnel segment (9'), the body (2) being manufactured from a first material and the nose part (5) being manufactured from a second material, the nose part (5) being more easily compressible than the body (2).
