Abstract (en)

[origin: EP0893354A1] The combination can is made up of a multi-layered wrapping cardboard. The intake opening's built edge (5) is shaped outwards to a flange. There is a base (2) sealed on the inner lining in the region of the flange, on which the intake opening has a sealed membrane (3). The jacket retracts inwards as far as the region of the intake opening, such that the sleeve cover (4) lies from the outside, in alignment with the outer side of the jacket. The membrane maybe made from cardboard or cardboard composite.
