Abstract (en)

A one-piece moulded plastics tie comprises an elongate strap 40 provided with head 41 at one end and with a series of ratchet serrations on one side thereof, a pawl 46 in the head for engaging the strap serrations when the strap 40 is passed through a passage 44 in the head and a pair of levers 47 arranged on opposite sides of the head 41 for increasing the height of the passage 44, in order to release the strap 40 from the pawl 46.
