Abstract (en)
[origin: EP0893631A2] The vehicle engine cylinder head incorporates a flat metal gasket (1). The gasket has an aperture (6) which is fully surrounded by two concentric seams (3,4) incorporated in the same layer of material (2). The width (b1) of the inner reinforcing seam is in the range 1:1.5 to 1:10 of the width (b2) of the second seam. The two seams consist of regions deflected to opposite sides of the flat plane of the gasket.
