Abstract (en)
[origin: EP0893860A2] The arrangement includes two lamp sockets arranged respectively in a socket reception (18) which includes respectively an integrated device for a pull-prevention for electric conductors (22) leading to and/or coming from a ballast circuit. The socket reception consist preferably of a base element (26) for recording the pull-prevention device (38), and a mounting frame (24) for mounting the lamp socket (16). The base element and the mounting frame are preferably arranged vertically to each other, or one after another in direction of the longitudinal axis of the lamp.
