Abstract (en)
[origin: EP0893936A2] The loudspeaker basket has an upper edge (11), a base (12) and at least one strut (13), which connects the base and upper edge. At least one latching hook (16) connects at least one part of the magnet system (20) to the base, when the magnet system has adopted a desired position on the base of the basket. Each strut is sprung in the direction of the loudspeaker axis (15). The latching hook extends from the upper edge towards the base. The end of each hook faces away from the upper edge and has an angled part with its base side parallel to the base.
