Abstract (en)

The rigid or half-rigid system cell system with extensible ends, for recreation nautical hulls, consists of a rigid or half-rigid cell (1) that may be realized out of fibreglass, wood, aluminium or similar, to which one or more extensible parts (3) are fixed and/or joined, or inflatable parts passing through said cell, so as to keep the hull in small dimensions when it is not used while, at the moment of use, said parts are suitable extended or inflated so as to form a functional float. <IMAGE>
