Abstract (en)  
[origin: EP0894904A1] At least one further dirty water tank (4, 5) is provided, which has an inlet connected to the outlet of the first tank and an outlet connected with a flushing system of a toilet. A retainer is provided, to which the dirty water tanks (3, 4, 5), connecting conduits between them and the connections for the cistern (6) and/or toilet basin (9) and/or a drinking water conduit are fixed. A connecting device is provided for mechanical application and for inlet and outlet connection of a toilet basin (9). The retainer has a common outlet (10), which is connectable with a building-side outlet installation and in which all outlets of the device issue. The retainer is formed as a front wall installation.
