Abstract (en)
[origin: EP0894920A1] Lock (1) for a vehicle door, comprising a support body (4, 20), a closure mechanism (5) with a fork (6) and a stop (7), and an actuating mechanism (22) arranged to interact with the closure mechanism (5) and comprising a plurality of levers (32, 33, 34) allowing actuation by means of manual control components associated with the door and at least one exit component (28) arranged to cooperate with the stop (7) to release the fork (6); the lock also comprises a signalling module (50) provided with a plurality of micro switches (52, 53, 54) to define the position of the mechanical components (33, 6) of the lock (1) and comprising a box-type body (51) enclosing the micro switches (52, 53, 54) and the relevant connecting means (59) to an electrical installation on the vehicle. <IMAGE>
