Abstract (en)

[origin: WO9740250A1] Safe device (1) comprising a number of safe-deposit boxes (2) each lockable by an individual door (3), in which a storage container (8) can be slid, said container being provided with pins (16) operable with a key (14) by which said container can be secured to the walls (4) of said safe-deposit box (2). The key (14) can only be taken away after securing the container (8) and the door (3) of the safe-deposit box can only be closed if the key (14) has been removed from the container (8). Signalling and protection means (22) have been provided for signalling when the door (3) of a safe-deposit box (2) is closed while there is no container (8) present and secured in it and for signalling when someone is trying to force the door of the safe-deposit box.
