Abstract (en)
An iron (10) especially suitable to be used in footwear and leatherware sectors, comprises a tool (14) tied to a grip and handling body (12), made from metal and provided internally with a plurality of ducts and seats forming one or more chambers (18) and/or (20), for a fluid to be atomised, and an adjoining cavity for a heating body (24), at least one of said chambers having a partly or entirely irregular internal surface (36), communicating with the outside of the tool (14) through a nozzle (32). Preferably, the iron is fed by a system delivering, through an atomising device (14), a mix of air and water let in one of said chambers (18), (20). <IMAGE>
