Abstract (en)
The bottle comprises a receptacle (1) with a detachable base (2) and a microporous membrane (7) which has a anti-aeration properties and which extends into an opening (8) provided in the base. The membrane is integral with the base. The membrane may have several openings in the base. The membrane may be moulded over the base. The openings may be part of a support (6) fixed to the base and the membrane may be moulded over the support.

Abstract (fr)
Un biberon est constitué par un récipient (1) comportant un fond amovible (2) et une membrane microporeuse (7) ayant une fonction antiaérophagique et s'étendant dans une ouverture (8) ménagée dans le fond amovible (2). La membrane microporeuse (7) est solidaire du fond amovible (2). <IMAGE>
