Abstract (en)

[origin: EP0895933A1] The workstation, at a packaging machine, has a lifting mechanism to close the tools together, and a further lifting system to give an additional and final closing movement. The additional lifting system has a drive (23) and a mechanical reduction system (55,80,90,61), with a constant force development. The further closing movement action is triggered on meeting a resistance.
