Abstract (en)
In a double-layer sheet-metal roof with intermediate heat insulation out of roll felts, with a sheet-metal profile support, a sealing layer disposed thereon - if required, insulation material disposed thereon, preferably in form of a roll felt out of mineral wool, and with a sheet-metal profile cover layer disposed thereabove, with spacer profiles between which the roll felts are arranged in cassette-like manner being arranged between said sheet-metal profile support and sheet-metal profile cover layer, said spacer profiles comprise web flanges spaced to said sheet-metal profile cover layer and protruding laterally, which for the purpose of mounting substantially free of heat and/or cold bridge are in knife-like or claw-like engagement through the roll felt side wall directly into the material of the roll felt having no recesses in this area.
