Abstract (en)
[origin: EP0896400A2] The arrangement (1) is in the form of a plug socket strip in a housing (17) and a connector cable (3) with a plug (4) for connecting the connector to the low voltage network. A bus coupling and a driver stage are built into the housing, whereby the circuit formed by the loads connected to the sockets can be remotely switched via the bus system, or additional programming can be conducted.
