Abstract (en)
[origin: WO9741620A1] As the number of satellite dishes increases, the invention proposes a film sticker for satellite dishes with individual designs to improve the visual environment. The ornamental design is to be protected separately by design copyright. The films are self-adhesive and resistant to UV and frost. Reception is not impaired. The stickers are for dishes of all sizes. Due to the concave shape of the dishes the film sticker requires a special cut. The disc is subdivided into 10 sectors to provide a smooth sticking-on process without creases, eliminating 0.51 % of the total circumference.
