Abstract (en)

[origin: DE19607937A1] The plant (1) comprises a standard container which is longitudinally divided into a treatment room (3), a heat generator room (4), an electrical unit room (5) and an office (6) for the plant operator. The preparation and feed device for preservative (K) is installed outside the container and is connected to pipe-couplings (14,14') at the side of the container via feed and return pipes (15,16).
