Abstract (en)

[origin: EP0897885A1] Method for transporting sheet like products, wherein a number of lifting means is positioned on an upper side of a sheet like product and at least one backside of the product is lifted from an underlying sheet like product over a distance which is relatively small, whereby first pushing means (18) are forced against said lifted backside of said product and the product is pushed onto pulling means present underneath the front side of the product, after which the first pushing means are released and the product is pulled further with said pulling means to a processing area. <IMAGE>
