Abstract (en)

[origin: EP0898037A1] The motorised remote control comprises an electronic locking device (9) suitable for auxiliary locking of the door (2) when closed and unlocking when activated by the remote control (5). The remote control has visual and/or audio signallers (10) which sound and/or display when the locking device doesn't work. The signallers comprise a sensor (13) for checking the locking situation, a visual and/or audio signaller (14) and a processor (15) which interprets the information transmitted by the sensor. The processor is directly connected to a control unit (8) for the remote control.
