Abstract (en)

[origin: EP0898290A2] The holding device has two holders (1) each of which has spaced-apart, comb-shaped parallel grooves on one side (12) for holding a stack of quenching plates laterally. The other side (14) of each holder is also provided with grooves (18), but with a smaller width and smaller separation from each other. The holders may be plate-like in shape and identical to each other. Two holders may be provided for each stack of plates.
