Abstract (en)
[origin: EP0898291A2] The power control device (11) has a setting device that is adjusted to control the output power of the electric heating appliance. A switch contact (15) is attached to the setting device and contacts a counter-contact (14) in the closed switch position in which the heating appliance is supplied with current and spaced from the counter-contact by a variable distance (D) in the open switch position.
