Abstract (en)

[origin: DE19709705A1] The invention relates to a wall bushing (10) which has sealing elements (24, 29) for sealing against the inner surface of a wall opening (D) and at least one line leading through the wall, and a clamping device (20, 30, 28) for fixing said bushing (10) in said wall opening (D). Said clamping device (20, 30, 28) also comprises an anchoring unit (20) which holds the sealing elements (24, 29) and which can be located in the area of one front end of the wall opening (D), and a reverse clamping unit (30, 30') which can be located in the area of the other front end. Said anchoring unit and said reverse clamping unit can be braced against each other by means of joint clamping elements.
