Abstract (en)

[origin: EP0899229A2] The stacking device has a means of setting the position of the sheet transporting belts. It includes a headpiece (1) carrying guide and drive devices for the belts (6, 7). There are guides (16) for the transporting belts resting on trolleys (21, 38, 45). During the operation of the stacking device, these trolleys are moved under control so that the position of the transporting belts is made compatible with the format of the sheets.
