Abstract (en)
[origin: EP0899385A2] The flush tube has a vertical overflow pipe with a closure at its lower end formed by a discharge valve. The housing has a float holder with a float having two pull rods for discharging a large or small flush. The float holder (18) is mounted in the upper area of the cistern (6) and has two openings. The second opening (40) has a closure (38) to selectively close it which is opened by movement of the draw rod (30) to discharge the small flush.
