Abstract (en)
[origin: EP0899386A2] The drain fitting for a first, upper float (2) is fixed to a first pull rod (4) for releasing s small quantity of water. The float and/or rod are attached to the overflow pipe (6). A second float (18) is located in a float tank (16) on which a locking bar (30) is mounted. The bolt can be pivoted by a second pull rod to release the second float for flushing with a large quantity of water.
