Abstract (en)  
[origin: EP0899402A2] The lock fitting has locking members comprising a bolt projection (17) on the opening section and a locking piece (2) on the frame, which come into engagement by relative movement. Both have several contact surfaces (21,23) positioned transverse to the mating faces (5,6) of the frame and section. Preferably, the contact surfaces are tooth-like protrusions having a section corresponding to a metric thread.
