Abstract (en)
[origin: EP0899508A1] The fuel jet (105) produced by the fuel nozzle (104) has an emission angle which corresponds approximately to the adjustment angle of the components (101,102) forming the spin producer (100) in relation to the axis of the burner or of the combustion chamber. The spin producer comprises a number of circular blades. Use - As a burner for a heat producer.
