Abstract (en)

[origin: EP0899761A2] The activation switch built into an item of electrical equipment and has a push button 11 moved between an on and an off position. The button has a pair of holes 15 on opposite sides that receive the ends of metal arms 17, 18 that project from a hanger 21. The hanger slides along the arms to a locked position and the push button cannot be moved.
