Abstract (en)
[origin: EP0899822A2] The present invention relates to a plug-in connector arrangement having a housing (1) which in the longitudinal direction has holding shafts (3) for plug-in contacts (20) and a secondary locking element having a secondary locking slider (4) which is held in a channel, extending transverse to the plug-in direction, in the housing and engages in the holding shafts (3), it being possible to displace the contact locking slider (4) between a position for inserting the contacts (20) and a contact locking position. The secondary locking element has guide means (8; 14) which guide the secondary locking slider (4) with a direction component parallel to the longitudinal direction of the holding shafts (3). <IMAGE>
