Abstract (en)
[origin: WO9740733A1] The invention relates to a vacuum cleaner with a motor-suction unit and a cable drum (28), in which the motor-suction unit can be removed from a base section (3) for use as a manual device (2) and the cable drum (28) is fitted in the base section (3). In order to improve the handling of a vacuum cleaner of the type in question, it is proposed that the base section (3) be mobile and that the motor-suction unit be completely detachable from said base section (3).
