Abstract (en)
[origin: DE19720909A1] The housing is formed from a basic body (6) made of plastics with any particular coloured or chrome top surface and a cover body (7,11,16) covering the basic body. The cover body is formed as one piece and can be clipped onto the basic body from the outlet side. The cover body is provided with a U-shaped recess (10) opening at the top for the through passage of the housing connection (9) receiving the end region of a plunge rod (8). The cover body consists of two halves (13,13') which can be clipped together and separate in the longitudinal direction. One of the halves is provided with a mould (15) for an additional cover of the housing connection.
