Abstract (en)

[origin: EP0900598A2] Dispenser has a pump action produced by pressing the top of the container which compresses a bellow section (5) to force the product out of a dispensing nozzle (8). Piston (2) in the bottom of the container is drawn upwards during the release stroke of the pump. Cosmetic product contains microcapsules with a diameter of 0.1 to 4 mm, which are ruptured by the pump action through the nozzle to release the contents for application.
