Abstract (en)

A method of completing a subterranean well having intersecting first and second wellbores, and a deflection surface positioned proximate the intersection of the first and second wellbores, the method comprising the steps of: deflecting a first tubular string (52), which includes a releasable deflection device (62), off of the deflection surface from the first wellbore to the second wellbore; and releasing the deflection device for displacement relative to the remainder of the first tubular string. Apparatus is also disclosed. <IMAGE>
