Abstract (en)

[origin: EP0901052A1] Electronic automatic unit can be used as a single unit or as a group or units. Automatic electronic unit supports chronometer (2) fitted with at least two control pushbuttons (8,9), and has a control box (1) with a location (12) in which the chronometer is placed. The control box has input connections (30,40,36,42) which receive electrical signals from sensors for events to be timed by the chronometer, and has also chronometer controller (51,52) which acts on the controls (8,9) of the chronometer as a function of the sensor input signals and timing controls (62,63).
