Abstract (en)

[origin: EP0901770A2] Dishwashing machine with a rack supported on each side in the washing vessel of said machine and selectively displaceable from an upper position to a lower position, and vice-versa, by means of a front pin and a rear pin that are slidable along two slots in a side-by-side arrangement, respectively. Said slots (23, 24) are asymmetrical and in the shape of a V turned in such a way as to have their vertices facing each other. The lower legs of said slots comprise respective seats (23i, 24i) adapted to accommodate their respective sliding pins (13, 14) so as to support the rack (10) in the lower position thereof, whereas the upper legs of said slots comprise respective seats (25, 24s) adapted to accommodate the respective sliding pins (13, 14) so as to support the rack (10) in the upper position thereof. <IMAGE>
