Abstract (en)

[origin: EP0901856A2] The grinder (1) has a drive device for a grindstone (7) surfaced with abrasive material for grinding sheet metal. There is also a second grindstone (8), both grindstones being driven by the same drive device. The sheet is placed between the two grindstones and is ground on both sides simultaneously. The grindstones are on drive spindles, at least one of which can be turned or moved linearly relative to the other.
