Abstract (en)

The machine is in the form of a tracked vehicle (2) with a rear spreader (8) for the surfacing material (6), followed by a rigid transverse leveling blade (14). The machine has a front-mounted bin (5) to hold the surfacing material, and a conveyor (7) to transport the material to the rear, where it has a spreader and a rigid transverse blade. The blade has a regulator for adjusting its height and angle of inclination relative to the road surface, and is suspended from a carrier (15) articulated to a supporting frame (16) connected to the vehicle chassis. The leveling blade is of adjustable width, comprising a main section and an extension which fits between adjustable side walls.

Abstract (fr)

Cet engin comporte, d'avant en arrière, des moyens (6) de réception d'un matériau routier, des moyens (7) de convoyage du matériau routier vers l'arrière de l'engin (1), des moyens (8) de répartition latérale du matériau sur une surface de mise en oeuvre (9), et un dispositif (3) de mise en forme du matériau routier. Ce dispositif comprend une lame rigide transversale (14) de nivellement du matériau routier. Application au reprofilage à zéro de chaussées. <IMAGE>
