Abstract (en)
[origin: EP0902142A1] The panic lock has a casing with a lug which can be gripped from outside the casing. The nut controls a tumbler and a return lever for a drive rod coupling which is actuated by the lug. The tumbler has a projection (12) extending in the plane of the return lever (13) to allow adjustment of the tumbler by pressing in the return lever from the exterior. The projection can be detachably mounted on the lever.
