Abstract (en)

[origin: EP0902154A2] The window pane (5) is held in a rectangular frame (6) which is secured into the aperture cut into the room divider panel (1). The frame has a main section and a removable sub-frame (8) by which the glass pane is secured after the main frame is fitted into the aperture. The main frame is fitted using screw fasteners (11) screwed into retaining profiles fitted into the hollow centres of the wall panels and with the profiles secured by other screw fasteners. The sub-frame can locate inside the main frame using profiled mating faces. The frame is made of fire retardant material.
