Abstract (en)
[origin: EP0902443A2] A planar coupled coils arrangement including a first coil (S1), in which a first conductor path section of the first coil (S1) is arranged in a first plane, and in which a conductor path section completing the first coil (S1) is arranged in a second plane, and is electrically connected by one or more connections to the first conductor path section. A second coil (S2) is used and its conductor path is completely or partly arranged in the second plane, and if the conductor path of the second coil (S2) is arranged partly in the second plane the part of the conductor path completing the second coil (S2) is arranged in the first or a third plane, and is electrically connected by one or more connections to the first conductor path section of the second coil (S2). Both coils (S1,S2) are arranged symmetrically to one another and the conductor paths of the coils are mutually arranged so that coupling takes place between the coils (S1,S2).
