Abstract (en)
[origin: EP0902507A2] The plug has a first plug element (1) inside the plug and second element (2) around the first element. The first element has a first contact position for a direct connection of the first element to a first coaxial cable element, esp. the inner conductor. The second plug element has a second contact position for direct connection of the second plug element to a second coaxial cable element, esp. the outer conductor. The first and second contact positions of the plug elements are freely accessible before connection to the coaxial cable elements. The plug has at least one element (22,24) which connects the first cable element to the first plug element at the first contact position and/or the second cable element to the second plug element at the second contact position.
