Abstract (en)
[origin: EP0903088A2] The holder consists of three wires, two (2,3) of which run spaced from one another in the holding region. The ornate stone (5) lies on both these bottom wires. A further wire (4) runs over the top side of the ornate stone and this is attached to the other wires by use of a top wire offset from the stone. The top wire is tensioned against the two bottom wires in such a way that the ornate stone is clamped in by the three wires. The wires are elastically deformable and run in essentially straight lines, the two bottom wires running equidistant from one another.
