Abstract (en)

[origin: EP0903299A1] The container has an internal foil container with folded edge (10) with an edge reinforcement. This is adapted to the outer contours of the sealing edge corners of the outer container, and is welded to the folded edge in the corners. The reinforcement consists of reinforcing corners (12) or an all-round frame. The front edge (13) and the neighboring parts of the side edges (14) of the folded edge are connected to a rolled-up foil apron (15), which may be rolled out.
