Abstract (en)

[origin: WO9740218A1] A device (1) for opening a gripper clip (2) of a mechanical loom gripper (3) has a stop element (4) arranged in the path of displacement (24) of a stopper (23) of the gripper clip (2) and whose position in the direction of displacement (A) of the gripper (3) can be adjusted by means of a drive (5) controlled by a control unit (6). The stop element (4) can slide in a guide in such a way that it can be moved out of the path of displacement of the stopper (23) upon a command from the control unit (6).
